

RTView® Monitoring Across the Middleware Stack

for TIBCO, Solace and Kafka

SL Data Sheet

Reduce severity 1 & 2 incidents by up to 80% and improve MTTR.

Correlate performance across TIBCO and non-TIBCO technologies for greater operational insight and faster response.

End-to-end monitoring with RTView Enterprise Edition.

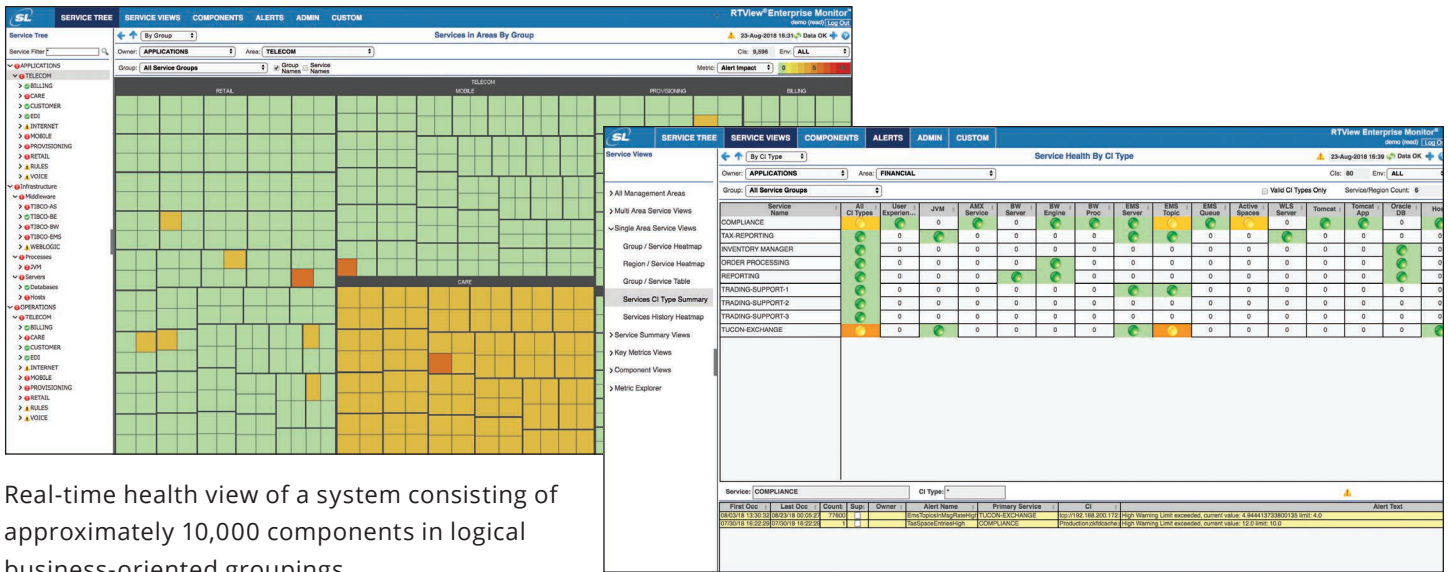

Middleware monitoring as a service with RTView Cloud.

End-to-End Monitoring

with RTView® Enterprise Edition

End-to-End Visibility Across Middleware Tiers and Vendors

Real-time health view of a system consisting of approximately 10,000 components in logical business-oriented groupings.

Understand the impact of component failure on the health of your applications and services.

Monitor Middleware as a Service

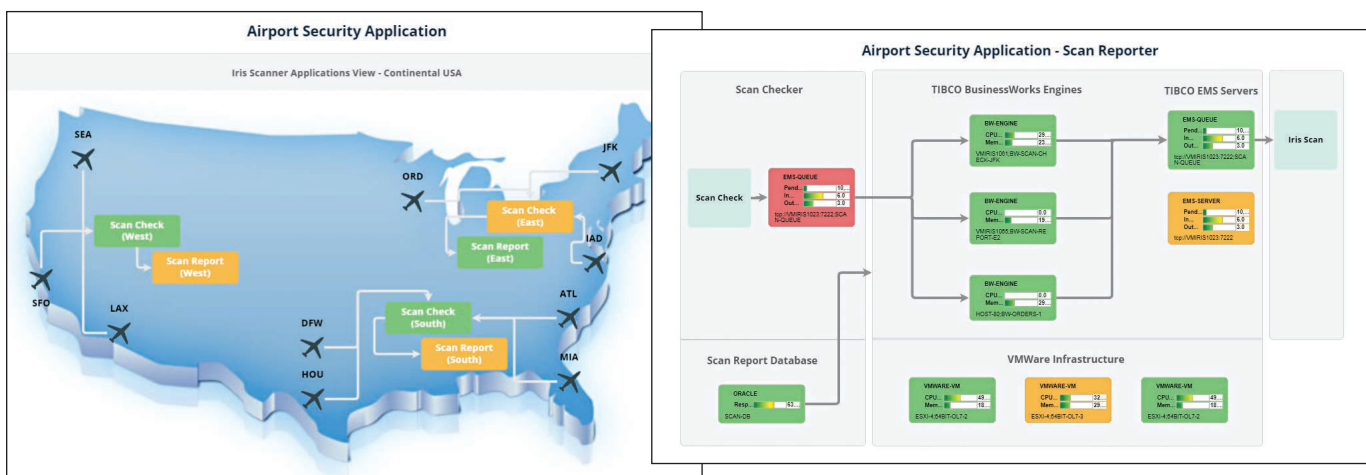

with RTView® Cloud

Hybrid SaaS Monitoring is now available from SL. RTView Cloud uses a next generation hybrid architecture with distributed DataServers and local collectors deployed on-premise and in public and private clouds, near the monitored application's workloads. Your monitoring data stays securely behind your firewall. RTView Cloud provides:

- Full functionality out of box with pre-built displays and pre-configured alerts
- Mobile device support with responsively-designed displays
- A browser-based designer to create completely custom displays with no programming
- Simple setup with the new configuration wizard

Create Custom Displays in RTView Cloud with No Programming

- Extend the out-of-box functionality with completely custom displays
- Design displays from a browser
- Provide your end users with the exact metrics they need in the way they would like to see them

Extend Your Existing RTView® Systems to RTView Cloud

SL Data Sheet

About SL

SL is the leader in Middleware Monitoring solutions. As a TIBCO partner for over 15 years, we have helped 100s of TIBCO customers find performance and resource constraints BEFORE they significantly affect application performance – reducing the number of severity 1 & 2 events by up to 80%.

By consolidating monitoring for both TIBCO and non-TIBCO products into a single pane of glass, support teams have the visibility they need, when they need it!

Choose Your Free Trial Now

- RTView Enterprise on-premise
- RTView Enterprise deployed as an Amazon AMI
- RTView Cloud – monitoring as a service

Extend your existing TIBCO RTView systems or SL RTView systems to work with RTView Cloud. Simply point your existing RTView Data Servers to your RTView Cloud instance.

- Consolidate all TIBCO monitoring information into mobile-friendly summary displays
- Pre-built displays and pre-configured alerts feature SL's new User Interface
- Hybrid architecture ensures all monitoring data remains securely behind your firewall
- Browser-based designer to design, collaborate, and publish completely custom displays with no programming
