

PRODUCT BRIEF

FAST FACTS

Company: SL Corporation **Contact:** pbhayani@sl.com

Website: www.sl.com

Company Description

SL is a San Francisco Bay Area-based software company that develops real-time monitoring, visualization and diagnostic software for Global 1000 and mid-market companies whose businesses depend on complex, high-performance applications. The company has deep expertise in monitoring and management of custom, distributed applications running in heterogeneous middleware environments.

RTView Cloud is SL's latest platform. It enables users to create and deploy beautiful custom visual applications driven by real-time data integrated from Cloud, IoT and on-premise platforms and applications as well as public APIs. Displays and dashboards are created via simple click-and-drag, with no programming, from any browser and can be easily embedded into other applications.

Product Profile

RTView Cloud's DataServer, running in an OpenShift Container, enables users to collect and stream real-time data from their OpenShift environments for viewing and interaction with any RTView Cloud application with minimal configuration. Data lives securely in your OpenShift environment and is accessible by your browser.

Overview

Enable your customers to easily collaborate, create, and deploy beautiful custom visual applications driven by your real-time data in highly-dynamic OpenShift environments.

Statement from Partner

"With our collaborative work and the use of RedHat technology, Red Hat and SL together are redefining the way the customer can access and interact with their real-time information enabling them to make better business decisions"
says Ted Wilson, COO

Statement from Red Hat Connect

"Customers are looking to migrate their applications to the cloud leveraging containers as the deployment model," said Mike Werner, Sr. Director, Global Technology Partners, Red Hat. *"Red Hat container certification assures a supportable platform for all types of customer deployment models. Red Hat is thrilled to work with software partners like SL Corporation, resulting in the world's largest commercial ecosystem for containers."*

TECHNOLOGY PARTNER

CERTIFIED TECHNOLOGY

Product Benefits

- Access to real-time information to enable better business decisions
- Users can collaborate, create, and deploy visual applications quickly and with no programming
- Reduce time to adopt containers and Red Hat OpenShift
- Real-time data from multiple cloud platforms, container environments and legacy on-premise environments

Use Cases

RTView® Cloud is a hosted data visualization platform that connects to both public and private data streams and content repositories, allowing you to create, share and publish customized, real-time dashboards. Provide answers to employees, customers, and suppliers – Anytime, Anywhere, on Any Device.

- IoT Platform Vendors
- Users requiring real-time information from multiple systems including:
 - IoT platforms
 - Cloud platforms
 - On-premise systems and applications
 - Middleware and IT Systems
 - Public and private data streams and APIs
